FuturePath – AI

Career Transition Guidance For The AI Era

TEAM NAME : OODS

DOMAIN 1 : The Aiversecity Future-Ready Workforce Domain

TARGET : SDG 4 (4.4) & SDG 8 (8.5)

THE PROBLEM

Preparing Payroll & Timekeeping Clerks for an AI-Driven Future

01 — Automation Risk

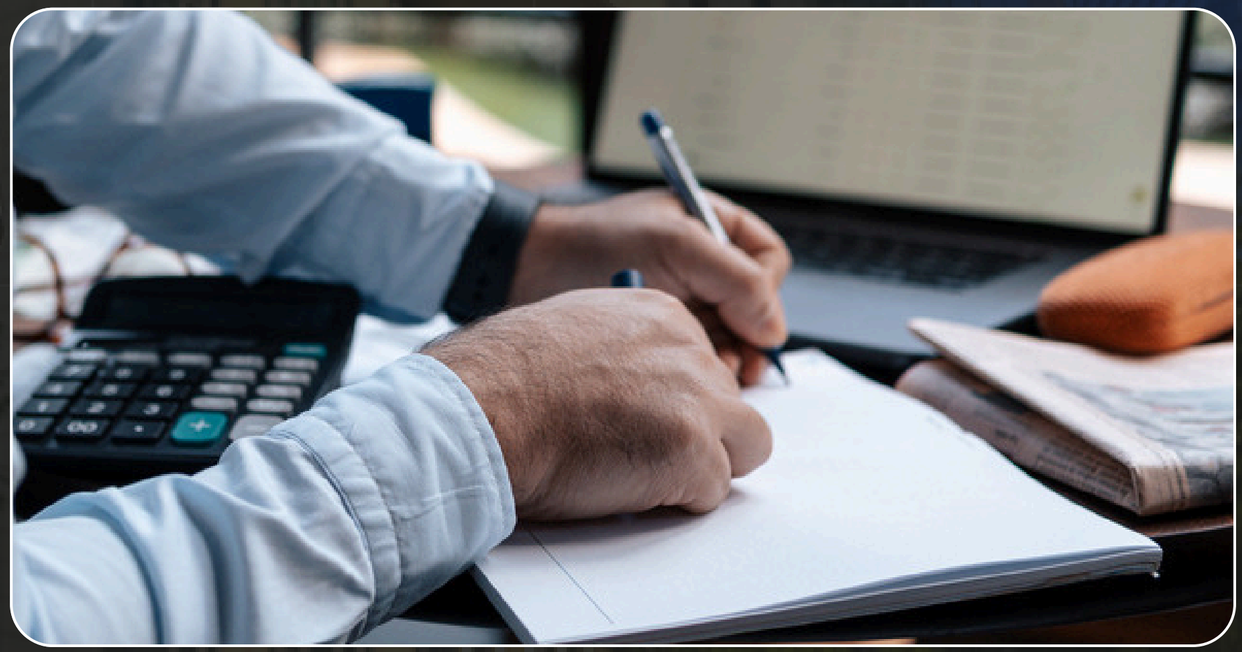

Routine payroll and timekeeping tasks can increasingly be automated using AI and digital tools.

02 — Skills Gap

Workers may need additional technical and digital skills to adapt to changing job requirements.

03 — Career Uncertainty

Workers may lack personalised guidance on suitable future roles and the skills needed to transition.

EXISTING SOLUTIONS

Our Focus: An integrated, role-specific career transition pathway.

MyMAHIR

- Provides job market and skills information.
- Supports career exploration and workforce upskilling.

jobstreet by seek

LinkedIn

MYFutureJobs
Your National Employment Services Provider

HIREDLY
Work Where You Belong

- Offer career guidance, job matching or skills recommendations.
- May serve users across different occupations.

FUTUREPATH
SINCE 2026

- Analyses CVs to identify users' skills focus on payroll and timekeeping clerks.
- Connects skills with AI-related job trends affecting payroll and timekeeping clerks.
- Provides future role matching, reskilling pathways and SDG impact.

KPI: Average time required to prepare and verify a complete career-transition pathway, measured in minutes per profile.
Phase 2 target: at least 4 of 5 synthetic profiles (80%) get a complete pathway; 100% of items show a source and date

FuturePath

2030

Responsible AI

Privacy :

- No login required
- No stored data
- Synthetic profiles only

Future path AI protects your identity and keeps your information safe

Human Decision Making :

- Recommendations are estimates
- Sources and explanations are provided
- The final choice is always yours

Empowers you with information, not a final answer

Consent :

- Clear notice is shown before the form
- Transparent use of data and AI tools

This ensures you understand how your information is used

Accountability :

- Designed to support workers
- Not for employer evaluation
- AI tools are clearly declared

Promotes fairness, trust and responsible use of AI

Future Path supports human decision making , not replaces it

Risks & Future Development

Key Risks

- Limited or outdated labour market data
- AI recomnedations may not fully reflect individual circumstances such as personal goals , locations, experience

Mitigation

- Use reliable sources and clearly identify data limitations
- Read data at runtime (no hardcoding)
- Keep users in control of their career decisions

Phase 2

- Expand career and skills datasets such as Malaysia data
- Add more career roles and industries
- Develop HR team view for organisational use

Continuous improvement for more reliable career guidance

FUTUREPATH
SINCE 2026

Future Path

“From Who I Am Today to Where I Can Be in the AI Era”

Helping workers understand their skills, explore future career opportunities, and prepare for AI-driven workplace changes
